

Name of Members:

Name1: Pranav Nambiar

Roll Number:2015063

Name2: Sanidhya Singal

Roll Number:2015085

The result count may come higher than what is expected due to our concept of entity resolution. According to our concept, the result of an author query will be matched to www tags and the names of the authors that are almost similar to the original author. e.g. matching Vinayak Vaik with Vinayak K. Vaik, Vinayak S. Vaik, Vijay Vaik, etc.

Results:

1. Name/Title Tag with sort by relevance

1.1 Sparse Metric Learning

The screenshot shows the DBLP Query Engine interface. The search query is 'sparse metric learning'. The results are sorted by relevance. The table displays 20 results, including author names, titles, page numbers, years, and journal names. The 'No. of Results Obtained: 92576' is shown at the bottom left. A 'Next' button is at the bottom right.

S.No.	Author	Title	Pages	Year	Volume	Journ.	URL
